Sound Art
Video Art

Curatorship:

Peter Castillo Lara

Director of the international exhibition of electroacoustic music MUSLAB, associated researcher of the Art Sciences and Complexity Program C3 Center of Complexity Sciences UNAM.

Manolo Coco

Director of the Art Sciences and Complexity Program C3 Center for Complexity Sciences UNAM.

Jaime Lobato

Asociated Researcher of the Art Sciences and Complexity C3 Center for Complexity Sciences UNAM.

Presentation:

Complex Planet presents a selection of different audiovisual and photographic sound works made by creators from all over the world through which our different cultural identities are analyzed through a relationship of endemic social processes and globalization. A social study where cultural identity is seen from contemporary art.

The proposal is based on the fact that a fundamental characteristic that enables evolution in nature is diversity, since if there is diversity, there are possibilities of genetic exchange and mutation, therefore, adaptation to a changing environment, this phenomenon is reflected in contexts both biological as well as social and cultural.

Thus, diversity guarantees evolution and adaptability, hence the importance of cultural identity and endemic aspects compared to global ones.

Argentina

About the author /

Composer, teacher, improviser, sound experimenter, bass player, etc.

Studies carried out at the IMMA Municipal Institute of Music of Avellaneda and at the Manuel de Falla Conservatory of Music Diploma in Contemporary Music.

Currently a member of Sonoridades Alternativas Música Contemporánea Argentina and of Horacio tío, an experimental free jazz trio.

Title / Título

La Sombra

Duración / Legth

18:10

Description of the piece /

The work is based on Carl Jung's idea of the Shadow that speaks of the part of ourselves that we do not want to see.

Martin Lurnagaray Cello, Cristina Vertraetten violin, Marcelo Delgado texts, Paula César flutes, Alejandro Ruscio guitar, Luis Mihovilcevic piano and Alejandro Pinnejas electric guitar participate in the work.

I proposed a sound skeleton that I sent to the musicians who were adding layers. In the end I polished the material and added more.

I also added my playing on Electric Bass, Singing Bowl keyboards and other idiophones.

Sang Mi Ahn (b.1979) is a composer who enjoys collaborative and interdisciplinary projects. Her blend of electronic and acoustic works have garnered numerous international awards, including the Indiana University Dean's Prize in Composition, the Heckscher International Composition Prize, the Republic of Korea Composition Prize, the Judith Lang Zaimont Prize at the Competition of The International Alliance for Women in Music, and the winner of the Women Composers Festival of Hartford International Composition Competition.

Her compositions have been featured in festivals and conferences across the United States as well as in Europe and Asia, including ICMC, ACMC, SEAMUS, Symposium on Acoustic Ecology, Americas Society, Ole.01 Festival, the World Saxophone Congress, the International Trumpet Guild Conference, the North American Saxophone Alliance Biennial Conference, and the International Experimental Film-Video Festival in Seoul. Ahn has taught Composition at Korea National University of Arts. She is now a Composition Lecturer at Yonsei University, South Korea.

Title / Título

When sea anemones dream

Duración / Legth

07:17

Description of the piece /

When sea anemones dream is an environmental piece dealing with marine pollution. The work describes the perspective of sea anemones on man-made pollution - their emotions, feelings, and reactions. The piece also explores the boundary between reality and dreams in one of the sound layers, represented by the sounds of everyday objects and their manipulated and distorted sounds. As the mixture of two different sound-realms creates mixed emotions, it produces an ambiguity in the listener who wonders what reality or dream states might be for the sea anemones. If the clean water is the reality and the polluted environment is just a nightmare for the sea anemones, or if the non-polluted water is a dream they can no longer have in their reality.

Sarah OUAZZANI TOUHAMI

Web page

<https://www.o-sarah.com/>

Country / País

France

About the author /

Visual and sound artist, the practice of video led me to be interested in the invisible, the unsaid, the sound, as a possibility of dialogue with the unconscious. Time, slowness, movement, myths, rituals, dreams, elements are at the center of my approach. For several years, I have been accumulating photographs, filmed images, sounds, which I collect from my surroundings, in my daily life, during travels. I use them in my creations. I seek to take the intimate towards the archetype, to introduce a playful dimension. My video and sound work have been seen and heard on hybrids festivals around the world: FILE Brasil, EVIMUS, STUTTGART FILM FESTIVAL, Germany, IN SONORA, BIDEODROMO, Spain, Festival de la Imagen, Colombia, TRAVERSE VIDEO, SUPERSONIC, France, SOUNDS LIKE, Canada... You can look at: <https://www.o-sarah.com/>

Title / Titulo Holobionte

Duración / Legth 10:00

Description of the piece /

A holobiont, from the Greek holo, "all", and bios, "life" designates at the same time, an animal organism or plant, the host, and the microorganisms it harbors. It encompasses both the one and the many. He is like a busy train, housing regular and occasional passengers. I was freely inspired by this biological concept, and I imagined that this train could harbor birds, and that each bird was itself a train. I chose to create a movement from the inside (of the body) to the outside (the body in its environment). This movement is accompanied by a movement of predominantly synthetic sounds towards predominantly anecdotal and instrumental sounds.

Country / País

United States

About the author /

Caroline Louise Miller is a US composer based in Portland, Oregon. Her work broadly explores affect, ecology, labor politics, tactility, and digital materiality, often addressing contemporary issues within dreamlike musical spaces that thread field recordings, shimmering textures, and romantic melodic lines through harsh noise and clattering dissonances. She has most recently received grants, fellowships, and commissions through Alarm Will Sound, SPLICE Ensemble with funding from Chamber Music America, Guerilla Opera, Transient Canvas, and Ensemble Adapter. In 2018 she won the ISB/David Walter Composition Competition for Hydra Nightingale, created with improviser and bassist Kyle Motl. Other projects include whistle-session hijacker, a collection of acousmatic/instrumental hip-hop crossover tracks. C.L.M.'s music appears across the U.S. and internationally. Caroline is Assistant Professor of Music in Sonic Arts at Portland State University, and holds a Ph.D in Music from UC San Diego.

Title / Título Red Sprite Lightning

Duración / Legth 11:00

Description of the piece /

Red Sprite Lightning is inspired by elusive electrical discharges called "sprites" that appear in the earth's mesosphere. While making the soundscape I imagined an interdimensional storm high in earth's atmosphere, in which strange things appear and disappear.

Trinton Hlynn (*2000) was born in Georgia and grew up in Alabama (2000-2011), and Georgia (2011-2019). They are a composer of acoustic and electroacoustic concert music. Hlynn's work has been performed throughout the United States, in Russia, in Austria, and in Germany.

Hlynn's music has been performed by soloists and ensembles such as Irvine Arditti, the JACK Quartet, Ensemble Dal Niente, Ensemble PHACE, the University of Iowa Center for New Music Ensemble, and the Eastman Graduate Composers' Sinfonietta.

Hlynn holds a Master of Arts degree in Composition and Music Theory from the University of Iowa, where they studied with Sivan Cohen Elias. They are currently pursuing a Meisterklasse certificate in composition at the Hochschule für Musik und Theater "Felix Mendelssohn Bartholdy," where they are studying with Claus-Steffen Mahnkopf. Their other career and composition mentors include Trevor Bača, and Robert Morris.

Title / Titulo

verdad efímera en el final

Duración / Legth

11:00

Description of the piece /

verdad efímera en el final was written in score to be recorded by 5 preprogrammed digital synthesizers, each defined in Supercollider prior to composing the piece. The recording was realized using Abjad, a Python API for Lilypond, to extract pitch and rhythm information from the score. Then, Python used this information to construct a Supercollider which coupled this information using a PBind for each synthesizer. The created files were then used to generate .wav files of each synthesizer's performance which were mastered in Logic Pro X.

Her current work spans instrumental, experimental and sound art composition. She is a member of UNACOM (Argentine Union of Composers), and is doing a postgraduate degree in Sound Art at the National University of February 3.

Her music was performed by different formations, including the UNTREF string quartet, Chamber Ensemble of the Argentine Air Force, among others.

She participated in musical and cultural projects within the Kirchner Cultural Center, Muntref, Tecnópolis, Centro de Arte Sonoro, among others.

Her music has been broadcast on Radio Nacional Clásica FM 96.7, Radio CaSo (art center sound), Sur-Aural Festival, among others

**Title / Título**

Dé-tail

Duración / Legth

06:00

Description of the piece /

Dé-tail arises from ideas and concepts about going through a sound piece or a piece in the dark, diving from the ears, paying attention to details. It is going on a journey, immersing yourself, letting yourself be guided by what the soundscape/trip proposes.

It is also an invitation: train stations where you go through different landscapes and climates. You listen to it like tunnels and the idea of going through something or being crossed by something. The piece is built with different field records made during walks and trips on trains, stations and platforms in which I fragment and choose from the raw material the features that have been most significant to me according to the experience lived on each occasion.

In 2022, he was a resident composer at Avaloch Farms (NH, USA) with LNK Percussion. He has won the Ise-Shima Special Prize (JP) and the Ida M. Vreeland Award (USA) for his compositions.

Title / Titulo

Directionality

Duración / Legth

08.30

Description of the piece /

directionality uses field recordings of public places juxtaposed and transformed into noisy, granular textures. The opposition of these materials creates a surreal environment. The aim of the work is to reflect on the existentialism of our collective infrastructures: We destroy our environment to produce, to interact, to become connected. What are the consequences of these actions?

Mark Ferguson

Web page

www.markfergusonaudio.com

Country / País

United Kingdom

About the author /

Mark Ferguson is a wildlife sound recordist and sound artist, best known for his projects exploring UK and European bat, bird and bumblebee species.

His recordings have been noted for their scrupulous attention to sonic detail, and have been praised for their thoughtful documentation of species behaviour: from the delicate sounds of buzz pollination next to one of New York's busiest freeways, to the subtle splashes of bats plucking insects from the surface of a canal.

His compositions and sonic arts projects exploit the unique capabilities of audio programming languages, studio processing technologies and experimental installation practices to immerse listeners in the complex, often hidden sound worlds of wildlife and natural phenomena.

Mark's award-winning work has been broadcast by the BBC, mentioned by the Guardian, and selected for performance in leading arts and cultural venues around the world.

She has been the recipient of various awards and distinctions during her career, and her works have been presented at prominent national and international festivals and events.

Title / Título

Plegaria

Duración / Legth

08:00

Description of the piece /

Plegaria is an acousmatic piece composed in 2018 as the composer's first in-depth exploration of the electroacoustic medium. This work presents the transition between two sound spaces that represent the earthly and the spiritual in human life. As the title indicates, this transition occurs in the space of prayer, understood as that action in which the person decides to look away from himself and his more corporeal, fragile and -in a certain way- limited, to delve into what is beyond the temporal, understandable and evident, and go towards the spiritual and eternal. This musical representation, rather than wanting to explain or communicate what said action is about, seeks for the listener to become a sensitive and lucid accompanist in both spaces and its transition, from the ears of the composer.

Hector Moy

Web page

<https://hmoy24677.wixsite.com/moymusic>

Country / País

Venezuela

About the author /

Hector Moy es un compositor, director y educador musical originario de Venezuela, con un amplio rango de actividades musicales en su haber. Sus inicios en la música electrónica se remontan al año 2004 a través del trabajo en conjunto con el Dr. Claudio Tripputi en el Laboratorio de Tecnología Musical de la Universidad de los Andes en Mérida, Venezuela. Desde entonces, la electrónica y el uso de tecnologías para la creación musical siempre han sido de gran interés para el autor. Su lenguaje compositivo en la electrónica es bastante ecléctico, con obras electroacústicas que rayan en la experimentación con ruido (Sounds of Confinement, 2020), obras netamente electrónicas con discursos seriales (Loopa, 2010), drones electroacústicos y puramente electrónicos (FNEI, 2008; Cat's Transcendent Meditation, 2020) synth-experimetal (Liturapu, 2021; Minimal Risk, 2010) y drum n' bass. Su catálogo está disponible en su página web, Soundcloud y BandCamp.

Title / Título

Mind Reshaping

Duración / Legth

5

Description of the piece /

Mind Reshaping es un dron generado en VCV Rack, modificado en Ableton Live y editado en Audacity. Se trata de una transformación constante de timbres y frecuencias, la cual sufre alteraciones constantes a partir de diferentes cadenas de efectos, los cuales, a su vez, sufren transformaciones en sus parámetros a través del tiempo. Es una obra parcialmente automatizada, las transformaciones tanto del dron original como de los parámetros de los efectos posteriores están controladas a través de osciladores de baja frecuencia. Finalmente, los resultados son editados para combinar diferentes iteraciones de las transformaciones obtenidas.

La composición de esta obra no tuvo concepto generador previo, fue el resultado de un proceso de improvisación en VCV Rack y posteriores experimentos tanto en VCV Rack como en Ableton Live. La idea de transformación inherente a la composición de esta obra se refleja en su título, Mind Reshaping.

About the author /

Much of Michael Lukaszuk's output explores the idea of generativity in music and sound art through the use of mobile devices, musical AI and coding as artistic practice.

His music and research have been presented at multiple International Computer Music Conference, SEAMUS (Society for Electroacoustic Music in the United States) and New York City Electroacoustic Music Festival events, and at the Toronto International Electroacoustic Symposium, the Now Hear This festival (New Music Edmonton), Cluster: New Music + Integrated Arts (Winnipeg) and the Australasian Computer Music Festival. He won 1st Prize in the Hugh Le Caine Awards – (electroacoustic music category) of the SOCAN Foundation Young Composer Awards. He holds a DMA in Composition from the Cincinnati College-Conservatory of Music, where he later taught computer music. He currently teaches as an Adjunct Assistant Professor at Queen's University in Kingston, Ontario.

**Title / Título**

Mercury Rising

Duración / Legth

7.06

Description of the piece /

Mercury Rising is about hearing the sounds of the 1960's space race within an acousmatic context, zooming in on the material qualities of various voices and technologies from this part of history. In addition to the use of sourced recordings, electronic music techniques of this time period are revisited with additional digital sampling and effects processing to consider their potential to be heard as retro-futuristic. The use of algorithmic processes to control behaviours of synthesized sounds points to the possibility of AI and related forms of generativity as fuelling new forms of competition and discovery.

About the author /

José Miguel Candela: Licenciado en Música - Universidad de Chile, Magister y Doctor en Artes con Mención en Música - Universidad Católica de Chile. Como compositor ha realizado obras para cine, teatro, y muy especialmente para danza contemporánea, superando la treintena de obras musicalizadas sólo en esta última área. También se ha destacado en el área de la música electroacústica, superando también la treintena de obras entre acústicas y mixtas. Ha editado hasta la fecha 9 discos de autor. Su música se ha tocado en Chile y en diversas partes de América y Europa, y ha sido editada en varios discos compilatorios tanto en Chile como en el extranjero. Fue coordinador de la Comunidad Electroacústica de Chile, organización que fundara junto a otros compositores en el año 2002. Fue fundador y organizador durante 6 años del Festival Internacional de Música Electroacústica de Santiago de Chile, "Ai-Maako".

Title / Título

Aquí (a Iván Pequeño)

Duración / Legth

9

Description of the piece /

La pieza, compuesta en 2021, intenta un diálogo con la composición "Ahora" (1974) de Iván Pequeño, obra que obtuvo el 2do premio en el Concurso de Composición Electroacústica de Bourges (Francia). "Aquí" se inspira en la estructura a la vez que en el valor político de la obra de Pequeño: él usa fragmentos de la II Declaración de La Habana (1962); en "Aquí" se utilizó (a parte de algunos sonidos de la obra de Pequeño) el discurso que dio Elisa Loncón Antileo, cuando asumió la presidencia de la Convención Constitucional (Convención que escribiera un texto constitucional de marcadas características progresistas, y que sin embargo fue finalmente rechazado por el pueblo de Chile en plebiscito de salida 2022). Un discurso cargado de esperanza, de diálogo abierto y pluralista, sin exclusiones, que simboliza la necesidad de una sociedad más justa, diversa, solidaria, democrática, plurinacional e intercultural.

Title / Título

PIANO HORSPIEL

Duración / Legth

16

Description of the piece /

¿Qué es un Hörspiel? ¿Qué sonidos lo caracterizan: sonidos naturales, sonidos de lugares, sonidos cotidianos, sonidos familiares?

Y ¿cómo hacer intervenir el piano a modo de contrapunto? ¿el piano, no sólo a través de la música que produce el instrumento, sino como presencia, como identificación...?

La ausencia de voz en primer plano, o su presencia, cercana integrando de la actividad doméstica, y remota en los paisajes, restituye un mundo imaginario, que es el de mi memoria y el de mis sueños. La idea de la pieza es la de confrontar dos mundos sonoros, los sonidos de tipo radiofónico (paisajes sonoros de interiores y de exteriores) y sonidos del piano, los cuales intervienen en situación y fuera de ella.

Si bien puede intuirse un relato subyacente, la magia del montaje abre las compuertas de la imaginación, permitiendo una multiplicidad de lecturas posibles desde la más anecdótica a la más abstracta.

Composer and student at the National University of Quilmes; develops investigative and artistic work. He has also participated in cultural processes and pedagogical training in Bogotá-Colombia. His tour includes works presented at the National Library of Buenos Aires, the New York Independent Theater Festival. His musical and sound work has been exhibited at the Zapadores Museum in Madrid, the IV and V International Festival of Contemporary Art in Manizales and the International Festival of Contemporary Music in Salta. "Sound Spaces Festival", "Fuse" University Festival, "Transversal Sonora" Festival in 2020, "La Ilusión" Festival in Pasto-Colombia, "Sur Aural: T' Festival iwokay, Otros Mundos Posibles" in Cochabamba-Bolivia

Also interested in the role that the artist can take as a multidisciplinary and hybrid being in fields such as scientific, human and social research: art as a means and link: a transversal tool for transformation and sociopolitical, moral, spiritual and human communication.

**Title / Título**

Cubo Sobre Cubo

Duración / Legth

6.40

Description of the piece /

The mind silences infinite tissues that scramble it, thought has become a single dimension that contains an essence that is also real and acoustic.

We are hybrid beings and this self-exploration, which is also a responsibility, has allowed us to learn to perceive this acoustic dimension of thought, to give it order and shape, to appropriate it, to generate new meanings linked perhaps in a quantum way in which it becomes Impossible to perceive through a single path. The whole body hears, all the water resonates, all the tissues see, smell and vibrate.< Cube on Cube is a work that speaks of anxiety as the great disease of the postmodern and capitalist world, a voice that is inside that shakes and gasps, seems to drill each act and each thought.

About the author /

Simona Dichio was born in 2003 in Cerignola(Foggia, Italy). Was introduced to music at seven years old when she starts studying classic guitar. Successively she starts studying also percussion, electric guitar and clarinet. Parallel to classical musical training, finds interesting electroacoustic and experimental music composition. She's graduated from the Music High School "C. Poerio" in Foggia and is actually registered to the first year of the Academic Triennium of 1 Level in Electronic Music at the "U. Giordano" conservatory in Foggia. Currently studying with the masters N. Monopoli, A. Cioffi and D. De Simone and was trained in the field of. Music Technologies under the guidance of professor Angelo Gualano.

Title / Titulo

The Last Walk

Duración / Legth

4.42

Description of the piece /

"The Last Walk" was created for the need to express a controversial state of mind, fought between the impossible quest for order and the terrible charm of chaos. An anonymous faceless, climbing the stairs of a palace, finds himself without his knowledge inside an unknown apartment but apparently tidy and quiet. When he looks around begins to release a quantity of irremediable chaos to whom he cannot escape: the apartment turns upside down and outside starts raining. However the infernal outburst seems not to cause torment in the protagonist, whom walking in the room, is faced in front of a window and, without waiting, throws down himself, leaving the listener doubtful about his fate.

About the author /

Hery Kristian Buana Tanjung (1989) is a composer from Samarinda, Indonesia, in search of musical experiment his focuses on a variety of environmental sounds. His preference for minimal music led him to electroacoustic. In February 2023, Hery collaborated with the Mosaik Ensemble in Berlin. He recorded his Krompunk Grompunk (mixed ensemble). He also collaborated with choreographers and directors, such as Angela Vela Hernandez (Spain) and Angel Salvatore (Philippines).

Hery received his Master of Arts in Music Composition from the Indonesian Institute of the Arts Yogyakarta, under the guidance of Royke B. Koapaha. Learned music composition with Michael Asmara and Patrick Gunawan Hartono. He has attended several composition workshops from composers such as Roderik De Man, Slamet Abdul Sjukur, Vincent McDermott, Dieter Mack and Otto Sidharta.

Hery is the founder of Kovajiva Mobile Studio with his wife Valentina Ambarwati, a choreographer, since 2019 until now.

Title / Titulo

Erratum

Duración / Legth

09.11

Description of the piece /

Erratum is an electroacoustic piece of music that focuses on processing instrumentation materials such as sape and gamelan. The processing of this material is done through the recording of separate instruments between the sape and gamelan. Then the recording is processed using a computer device. Here I process sound material using Ableton and some additionally I use max msp to set the frequency and tempo randomly. For processing, I also used a midi controller to adjust the thickness of the low frequencies directly in the recording.

In this work I imagine how sound can evolve into another form and continuously gradually and slowly.

He has also worked extensively as a freelance bass guitarist and in professional audio since 2004.

Title / Titulo

Static Storm from the Garden Dome

Duración / Legth

6

Description of the piece /

'Static Storm from the Garden Dome' is a sonic scene from the fictional future of 'Eden & Nova', created by Sam C. Roberts. The work imagines experiencing an electrical storm from within a curated bio-dome, where long extinct flora and fauna are recreated in a distant, post-apocalyptic future. As the storm passes overhead, it produces strange sonic reflections (represented by granular re-synthesis of natural field recordings), as the shielding technology of the bio-dome reacts to the rain, thunder and lightning above.

Title / Título

Dentro de la caverna, al final una pequeña luz.

Duración / Legth

10

Description of the piece /

La caverna no tiene otra salida más que cenital y su entrada es subterránea, es decir, desde el centro del mundo. Con esta primera indicación, la pieza electroacústica "Dentro de la caverna, al final una pequeña luz" fue creada bajo el profundo autodescubrimiento y la desesperanza necesaria para hacer una composición que signifique más allá de un simple hecho sonoro.

La pieza es una representación sobre el contenido vacío en sí mismo, es una búsqueda circular entre la desesperanza y la esperanza. "Dentro de la caverna, al final una pequeña luz" es una pieza que está constantemente buscando hacia la ascensión, que está buscando la luz entera.

He is autor of an algorithmic composition library for PWGL and OpenMusic, and collaborator in Opusmodus software.

Title / Titulo

Anamniseis

Duración / Legth

8

Description of the piece /

The work is a homage to Xenakis, from which different textures are drawn off. So the title wants to recall the remembrance, organized into a new set, of several listening, studying and so on about Xenakis's works, particularly Aroua, Concrete PH, Pleiades.

Durations and attacks are built around Fibonacci's numbers, so that the fundamental turn off of the piece is at a golden ratio proportionally point.

Electronic sounds are developed using specific OpenMusic patches created to satisfy expressive needs, using Casound libraries and over all Modalys OpenMusic library, and little Xenakis's electronic works samples.

It is a sort of journey of memory and of affectiveness, along past frequentations around the Xenakis's global operas.

Nicola Cappelletti (ITA/FRA) is an electroacoustic sound artist, performer and composer. After studying violin he graduated in electronic music, with honors and honorable mention, at the F. Morlacchi Conservatory in Perugia. Winner of the XV National Prize of the Arts (Electroacoustic Composition), his artistic research focuses on the relationship between acoustic sound and electronic treatment in relation to audiovisual works, theater and contemporary poetry.

As a performer his activity ranges from popular music, with forays into rock and club music, to concerts of radical improvisation for prepared violin, prepared electric bass and live electronics. His work has been presented at the International Computer Music Conference, SMC Conference, New York electroacoustic Music Festival, Colloqui di Informatica Musicale, Galleria Nazionale dell'Umbria, Auditorium Parco della Musica, Osaka University of Arts Electroacoustic Music Festival, Lund Contemporary, Festival Orizzonti , Bologna in Lettere, Encode, Dancity. He is a member of the Opificio Sonoro ensemble.

Title / Titolo b_k_n () **Duración / Legth** 09:00

Description of the piece /

The piece is inspired by the sculpture "The Broken Circle" by Beverly Pepper.

b_k_n() intends to restore the representation of a generating force, of an explosive event that produces the beginning of life and of the world, in a timbral and structural dimension where the contrast between stillness and dynamism creates a formal balance poised between possibility and impossibility . The overall circular trend offers as many interrupted paths of ascent and descent, interprets the conflict inside the original sculpture. The timbral research aims to recall the materials used for sculpture (Corten steel and concrete), with the preparation of traditional instruments as violin and an electric bass guitar, to generate sound materials to feed many electronic synthesis processes used to build the piece. The result associates the materiality of sound and the use of residual timbres as citations of the collective ancestral memory of the circle.

Doctorate in Social Anthropology from the National School of Anthropology and History. His lines of research cover transdisciplinarity where anthropology intersects as the main axis and establishes his studies between culture, art and technology. He is a tenured professor in the Social Communication major at UAM-X, and academic manager of the digital platform Clon: Cyberzine of art and culture, Espacio Sonoro and the Sensory Experimentation Laboratory "Javier Covarrubias". Among his exhibited work, "Myth is transformed", "Paramnesia", "Infancias insurrectas" and Rhapsody, Labyrinths of the self stand out. Her anthropological and cultural articles have been published on the Academia.edu platform and have been a reference for research on the body, literature, art and society.

Title / Titulo Eternity **Duración / Legth** 09:20

Description of the piece /

"The proposal of this piece is an approximation to the idea of eternity based on the crossing of spatiotemporal axes, and because it is a video performance we carry out a self-referential process, but not in a literal way since we will resort to the shadow of the subject, not to the subject itself. The shadow of him, understood this like that other that moves in the unconscious that only flows in dreams and in the imagination, that is, in a poetic reverie." It should be noted that the creative process of the piece implied a transdisciplinary development, that is, a collective creation.

Country / País France

About the author /

Born in 1970. Lives and works in France. He is painter, visual and sound artist.

The main idea of his movies would be to create a mysterious atmosphere and to implement a feeling "of disturbing strangeness". A moment, sometimes short, powerful and lively when the viewer is taken by pictures and the sound.

The experimental form of his movies is an asserted esthetic choice where the not narrative bias is assumed to leave free the sensitive perception of the viewer.

The patterns for his movies come from his immediate environment (landscape, sky, light, nature). It is also an echo of photographic patterns used besides and participate in the elaboration of a "mental landscape" (which is latent to his paintings).

The sound participates at the rate of the movies. It follows, underlines, amplifies this atmosphere to get and take the viewer in an experience beyond the reality.

Title / Titulo Daughter of snow **Duración / Legth** 08:33

Description of the piece /

"Daughter of snow" is a walk, a moment suspended in the landscape. We follow movements, a character appears. Nothing narrative. Just a vibrant and colorful space-time. Like a visual stroll. The textured images resonate with muffled and distant sounds. We are in a "mental landscape"

Dr Peter Consistently Falconer is a UK-based sound artist, composer, and voiceover artist, originally from Hartlepool.

His work frequently combines music, sound design, narration, historical research, and sonic journalism to tell parafictional stories about both our own and possible alternative realities.

He is also the curator of seatonsnook.com, an online archive of sounds and music documenting the history of a County Durham seaside resort called Seaton Snook, from its establishment in medieval times to its sinister vanishing in the late 1960s.

He is bisexual, and does not normally refer to himself in the third person.

Title / Título

Canch End Morning Radio

Duración / Legth

05:15

Description of the piece /

Synthesised soundscape with voiceover; fragments of a recovered interview describing the UK's first pirate radio station.

In the late 1940's, Canch End Radio was broadcast from the now lost town of Seaton Snook. As far as we can tell, it was the first pirate radio station operating in the UK. Their morning radio show was broadcast at dawn on weekdays for several years. Sadly no recordings were made, but fragments of an interview with someone closely involved with starting the station (possibly Robson Booth) have been uncovered. This video will remain separate from the official seatonsnook.com archive until we have further verified our sources.

Born in 1992 in Saint Jean de Luz, Ihintza-Chloë Hargous works as an emerging artist based in Angoulême since 2020. She is graduated from DNSEP in 2016 in the same city, at the European School of Image (EESI). She develops a multidisciplinary work (video and sound, photography, writing, painting). Her artistic approach is plastic, poetic and conceptual at the same time. She captures what she finds remarkable in her immediate environment, in everyday life and its minute events, as if she were constantly renewing the effort to look at the world with the eyes of a child.

Title / Titulo Matière noire

Duración / Legth 06:50

Description of the piece /

This project comes from a questioning on the idea of creation itself, that is to say on the form in the process of being made: it defines itself, vanishes, transforms and finally fixes itself in order to exist in the world. "Matière noire" (Dark matter) evokes by its title the dark and unfathomable space. The video alternates black and images, the sound populating or not the absence of things to see. The black image is treated here as a potential content, a hypothetical matter, a potential image.

About the author /

ANA MARIA RODRIGUEZ
Space – Poetry – Spontaneity

Ana Maria Rodriguez links the spontaneity of improvisation with fully composed scores. Often she takes part in the performances of her own works and can be seen on stage on the keyboards or as a laptop artist. At the same time, she also works with the acoustic and architectural conditions of the performance space when creating her compositions, installations and scenic works. Thematically, her latest pieces could be said to revolve around the relation between poetry and technology. This relationship does not only comprise the compositional use of words, poetry and literary sources, but also in a more abstract way the musical utilization of technological means to create a richness of perspectives based on poetry. Heterogeneous time layers, diverse spaces, plots running contrary to logic as in poetry—Ana Maria Rodriguez is committed to expressing herself in a precise and sensuous way.

Title / Titulo In nature alone are forms_Cosima **Duración / Legth** 08:00

Description of the piece /

This video is part of a larger work of several modules of which the video solo COSIMA is one. The sound is composed exclusively of different qualities of noise. On an abstract level, the noise includes both the sounds of our environment, its cycles (e.g. ocean noise) and the urban sound continuum.

The video takes the name of the cellist Cosima, who acts like a Tai Chi practitioner: focused on herself and her slow movements, no matter what is going on around her.

As in Tai Chi, the choreography uses different forms that flow smoothly into each other. The forms, in turn, consist of individual images that I see at the beginning and end of a movement.

With this video I wanted to show how we are simultaneously involved in the cycles of nature but at the same time and inescapably in the urban context.

Title / Titolo Luar **Duración / Legth** 09.32

Description of the piece /

LUAR is the inexorable descent of the man within himself. A fall towards the most hidden places of his soul where the protagonist struggles with the multiple representations of the self. The atavistic (primordial – forse suona meglio) conflict of every individual fragmented in a horde of identities. The poetic and the words of poet Fernando Pessoa accompany this descent towards never-ending subjectivity, through the labour of existence which, in its own way, finds a resolution.

LUAR is a Portuguese word that means 'moon light', the quintessential nocturnal light, the one and only light amongst the shadows, which allows to see the hidden side, in which the inner epiphanies emerge in their splendour, and cruelty.

Composition: Pedro Castillo Lara

Choreography and dance: Nadia Eréndira Ordoñez Negrete

Dance 01 is a video dance imagined from the movements created by a dancer in the water, conceived as a dream of visual and sound textures that seeks to create an immersive sound field from movement. An exploration in color and perspective, imagined through a window that looks at the sky from the bottom of the water, and is inspired by symbols that once communicated the terrestrial and subterranean worlds.

About the author /

Clemens von Reusner (* 1957), composer. His works of electroacoustic music and radiophonic audio pieces focus equally on purely electronically generated sounds as well as sounds found in special places and processed in the studio.

Clemens von Reusner composed commissioned works for radio and for festivals, and in his musical language he also repeatedly referred to contemporary as well as historical works from music, literature and the visual arts.

He is a member of the "Academy of German Music Authors" and he has received national and international awards for his compositions. They are performed at renowned international festivals of contemporary music in Asia, Europe, North and South America. Clemens von Reusner received invitations to the World Music Days for New Music 2011 in Zagreb, 2017 in Vancouver, 2019 in Tallinn.

Title / Título KRIT **Duración / Legth** 10:10

Description of the piece /

In Sanskrit language, KRIT means "to cut into pieces", "to split", "to spin a thread", but also "to play", and "to accomplish something by performing". Both notions of the word appear to me always essential and important in working with sounds. The foundation of KRIT is a chaotic basic sound which gets cut and split into many variations and assembled into new sound gestures and textures. During the course of the composition the basic sound is developed into chaotic as well as consistent states. Point or plane qualities emerge and are heard in different grades of density and spatialisation. Spatialisation: Ambisonic.

About the author /

His production includes instrumental, mixed and pure electronic works in the fields of contemporary music and incidental music for theater productions

He is interested in the development of an introspective aesthetic, in sound as a way of experiencing time and space, and in unconventional ways of structuring music.

His music has been performed in Argentina, Greece, Israel, Mexico, Portugal, Spain and the United States.

Title / Título "Palacio de Cristal" **Duración / Legth** 07:00
Description of the piece /

"Palacio de Cristal" is an octophonic acousmatic piece based on field recordings made in the venue of the same name in the Retiro Park in Madrid and composed during June 2018.

The piece oscillates between pure abstraction and the presentation of the material literally as it was recorded. The spectrum was divided, separated and fragmented into different channels to be reconstructed through the octophonic stage in a spatial resynthesis.

The result is a sound visit to the Crystal Palace but seen through a prism, through a translucent curtain, where we cannot clearly define the shapes and contours of what we hear, but we can guess as if we were seeing shadows on the evening.

11. Profile of the author / About the author Pedro Fraguela, born in Argentina in 1985.

He studied musical composition with mixed technique at the National University of Quilmes (Argentina). with Marcos Franciosi and Oscar Edelstein among others.

MUSLAB 2023

Name /Nombre Panayiotis Kokoras
Web page <https://www.panayiotiskokoras.com/>
Country / País Greece

About the author /

Kokoras is an internationally award-winning composer and computer music innovator, and currently Professor of composition and CEMI director (Center for Experimental Music and Intermedia) at the University of North Texas. Born in Greece, he studied classical guitar and composition in Athens, Greece and York, England; he taught for many years at Aristotle University in Thessaloniki. Kokoras's sound compositions use sound as the only structural unit. His concept of "holophonic musical texture" describes his goal that each independent sound (phonos), contributes equally into the synthesis of the total (holos). In both instrumental and electroacoustic writing, his music calls upon a "virtuosity of sound," a hyper-idiomatic writing which emphasizes on the precise production of variable sound possibilities and the correct distinction between one timbre and another to convey the musical ideas and structure of the piece.

Title / Titulo AI Phantasy **Duración / Legth** 10:00

Description of the piece /

AI Phantasy was composed at the GRIS multichannel studio, the University of Montreal in Quebec, Canada; the MEIT theater at CEMI, the University of North Texas, and my home studio. For the sounds I used a vacuum cleaner to set into vibration various membranes and a costume made mechanical circular pan flutes, which I then modulated with my hands, controllers and a robotic arm following the Fab Synthesis paradigm. The word Phantasy refers to a phantasy with "Ph" as a state of mind of an infant child during the early stages of development. Phantasies are constructed from internal and external reality, modified by feelings and emotions, and then projected into both real and imaginary objects. On the other hand, Fantasy (with "F") is a reverie, a daydream, an imagined unreality that anyone can create. We fantasize consciously about future possibilities and the fulfillment of our basic needs and wishes.

About the author /

Sound artist, improviser, organist and composer. Titular organist of the historical organ at the Parish of Ajuda (Lisbon). Researcher in GIMC (CESEM). Holds a DAS regarding contemporary organ music and a MA distinguished with the Dean's Honour Roll 2018. Currently a PhD candidate and FCT fellow in the same field (ESML/FCSH). Studied in Gregorian Institute of Lisbon, Hot Jazz Club and Physics Engineering (FCUL).

Had further studies with Adrian Moore, Åke Parmerud, Annette Vande Gorne, Barry Truax, Gilles Gobeil, Hans Tutschku, and Trevor Wishart.

His work has been premiered worldwide in; Arte no Tempo, Aveiro Síntese, Binaural Nodar, Festival DME, Festival Zeppelin, Iklectic, MUSLAB, MA/IN, Perpectivas Sonoras, Lisboa Incomum, L'Espace du Son, and World Soundscape Project. His acousmatic works have been published in MA/IN 2019 and Métamorphoses 2020. Self released two albums Asteroeidés and Palimpsestus. Released in 2022, Avant-garde Organ, funded by GDA Foundation and published by 9musas.

Title / Título

Neurotransmit

Duración / Legth

10:00

Description of the piece /

Neurotransmits (anagram of 'number stations') is an electroacoustic composition that explores the mysterious world of number stations. Featuring sounds from 'The Buzzer', 'The Pip', Lincolnshire Poacher, among others from different countries. The piece conjures the atmosphere of a spy listening in on clandestine transmissions in a safehouse.

The sounds of the number stations are woven together with the electronic hum and other electronic apparatus, evoking a sense of cold war operations. Other sounds mimic capacitors discharging such as bullets and bouncing balls. They are processed to decay since they are part of the same secret code. As the piece progresses, the listener is drawn deeper into the world of the number stations, walking a thin line between abstract and abstracted sounds.

The composer does not assume any responsibility or liability for any loss or damage, arising from the listening and prior triggering of: dead-man's switch, neural implants or psychological conditioning.

About the author /

Gustavo David Chab Argentina-España (n. Buenos Aires, 1964)

Composer of mostly electroacoustic works that have been performed in America and Europe.

He composed his first electroacoustic piece in 1993, specializing in electroacoustic composition techniques. His compositions, including works for instrumental music, electronic music and performances. He frequently explores the spatialization of sound in composition, mixing acousmatic fixed media and real-time sound generation.

His compositions have been performed at numerous festivals and he has received among many awards – Exhibitronic Award 2018/International Sound Arts Festival

(Strasbourg-France); FNA First Prize / Juan Carlos Paz (Buenos Aires, Argentina); a Special Mention from the Municipality of Buenos Aires and an Honorary-Residence Award from the GMEB International Electroacoustic Music Competition

(Burgos-France, 1993)

with Marcos Franciosi and Oscar Edelstein among others.

Title / Título Spiral Voice **Duración / Legth** 09:30

Description of the piece /

Spiral Voice (2019)

A voice from the past reaches the present as a Spiral in my mind. This voice is a short song in my grandfather's Ladino that emerge as a Spiral in the composition. This extract from The audio was taken from a video of my family. This work tries to combine sounds that are related to "the voice of Sepharad" (past) and sounds of the present that sometimes come from to my mind and appear in the form of repetition with punctual sounds. Mixing sounds that appear in different ways trying to go in the form of evolution as a Spiral. The sounds "of the present" are mostly made and created with Modular Synthesis, different kind of systems like the Buchla 200e in my residency at EMS Elektronmusikstudion 2018. Exploring the possibilities of these instruments trying to make it flexible as a poetic expression and then mixing within the atmosphere of the piece.

His music spans different instrumental ensembles and electronic media and has been performed in different countries in Europe and America. As an interpreter, his work stands out in the direction of choirs and orchestra, electroacoustic improvisation, spatialization and sound projection of electroacoustic works.

Title / Titulo

Miniaturas para piano y Electrónica sin pianista

Duración / Legth

12:00

Description of the piece /

Miniatures 10 11 12 Fourth part 2017-2023: Open form, metric modulation.

“A piano that resonates within a piano that resonates within a piano”.

The idea for the project arose in 2017 from a visit to a piano repair shop. A luthier showed me different disassembled and repaired pianos, all of different brands and in very different states. This contact with such diverse pianos and in such diverse states, opened up a great number of new gestures and sound possibilities to explore for me, and at the same time sparked a charm and interest in using the instrument as an interpreter in itself, and thus, reinterpreting its role as interface and sound generator, and also presenting it as an indirect interpreter, transformer and sound projector that recreates the piece according to its temperament, thus giving a different meaning to the gestures of the work in each performance, depending on the piano played. interprets and the space in which the work is projected. I am interested in projecting in the work the image of a formal sound construction where a piano resonates within a piano that at the same time resonates within another piano in which we find ourselves inside as a public spectator, being able to perceive the different sound planes generated.

This series of variations in real time forms the final part of a series of 12 miniatures for piano and electronics in fixed time started in 2017. It seeks to make a temporal study and establish the instrument as a central dramatic actor, governed by a conditioned mechanism within of a system open to the impact of the environment in which it is found and to the interference of the conditions of the environment in which it develops and to break the linearity of the discourse through exploring processes of transformation, reproduction, exchange of temporal and spatial structures , of gestures, sounds and sound objects, used in space and time.

About the author / Semblanza del autor

Dallas J. Herndon (b. 1994) is a composer, researcher, educator, and interdisciplinary collaborative artist. He holds a B.M in clarinet performance and music theory (with a minor in jazz studies) from Newberry College (Newberry, S.C.), and a M.M. in music theory and composition from East Carolina University. He recently completed his Ph.D. in music composition at the University of Utah, and taught courses in the areas of music theory, musicianship, and music technology. His creative interests integrate concepts of relativism, perspectivism, and environmentalism in music, and experiment with how changes in our perceptive experience might affect our understanding of meaning and identity. His works are often inspired by issues and phenomena found in our natural environment, and seek to challenge and bring awareness to how we understand and perceive our environment as human beings.

Title / Título Muted, Hear No Echo **Duración / Legth** 05:00

Description of the piece /

"Muted, Hear No Echo" is inspired by the environmental issues of noise pollution and modern industrialization. This work uses field recordings from urban areas and combines them with sounds of nature. Specifically, the musical material uses a variety of owl calls to express the dangers of noise pollution to owl species that rely upon natural communication for their survival, such as the Mexican Spotted Owl that can be found in Zion National Park. The solo trumpet functions as a personification of the owl call and is generated through the conversion of the owl call field recordings into MIDI to determine the initial pitch material. It is then further altered with various timbral techniques and other electronic effects. The choir functions as a disruptive catalyst of the "noise" element, ultimately dissipating and polluting the owl's capacity to communicate effectively, by the movement's end.

His creative practice combines synthesis, spatial audio, ecoacoustics, and electronics to produce immersive contexts for experiencing the intersection of nature and math. Charles has designed and produced A/V systems for architectural media installations across North America, including the Statue of Liberty Museum and MoMA PS1. He is currently pursuing a PhD in Computer Music at UC San Diego after earning a master's in Music Technology from New York University.

Title / Título Ecospherical / Phantom Falls **Duración / Legth** 09:00

Description of the piece /

"Ecospherical" is an ambisonic work immersing listeners in natural and hybrid soundscapes of California and the Pacific Northwest. This project is based on extensive field recordings taken with a third-order ambisonic microphone array, documenting diverse ecosystems in the face of a rapidly changing climate. By decoding the spherical soundfields captured with this technology, listeners are acoustically transported to these remote locales teeming with life. In collaboration with performers at UC San Diego, instrumental improvisations have been spatialized to become integral parts of these soundscapes, communicating in the cadences of their surroundings. "Phantom Falls" is an excerpt from this work, bringing together cello and clarinet in California's North Table Mountain Ecological Reserve. "Ecospherical" aims to bring awareness to the character and fragility of the ecosystems around us by exploring their unique musicality.

He moved to Berlin in 2000 as a guest of the Artists-in Berlin program of the DAAD (German Academic Exchange Service). Verandi's output is wide-ranging and include electroacoustic and experimental music as well as sound installations and music for dance and radio. Mario Verandis works have been performed worldwide in events such as Multiphonies GRM (Paris), Donaueschinger Musiktage (Germany), Kontakte Festival Berlin and MaerzMusik (Berlin).

Title / Titulo Bellscape

Duración / Legth 19

Description of the piece /Descripción de la obra

In this piece I aimed to explore the spectral and morphological characteristics of bell sounds as well as their manipulation and transformation through the use of computer software. Another important compositional element was sound spatialisation or the placement and movement of sounds in space. Bells are often heard in open spaces and therefore parameters such as distance (near and far), loudness and decay time were incorporated in this piece. I mainly worked with bell recordings of the Carillon at the Haus der Kultur der Welt in Berlin which were kindly provided by the Electronic Music Studios of Technische Universität Berlin. This piece was composed at the ZKM (Center for Art and

Title / Titolo Brucaradici **Duración / Legth** 09:04

Description of the piece /

"Brucaradici" is a piece for fixed media that explores the variation in the width of the meshes that create a sound mass. Moreover, through sound processing techniques based on iteration, it has been possible to "tame" the flow of these masses allowing the movement between the organic gestures of the latter and the digital one coming from the sound processing.

The result is a witness of the polymorphic sound potential: the material element is revealed through moments of microscopy of the voice modulated by augmentation dynamics triggered by the electronic and artificial control of digital sound processing.

The resulting new hybrid identity then takes the breath of a unique living organism that responds to the morphogenetic changes that its two natures impose on it. The Brucaradici seems to consider as the only possibility of existence: the activity of observation of its own evolution.

Title / Titolo SHOMO

Duración / Legth 07:32

Description of the piece /

What people say is not always what they think, people act to exist in the society, to live a life that follows certain rules of standardization. Occasionally, particular events bring us outside our routine in which we are constantly immersed, almost to the point of drowning, and some thoughts emerge like interferences in our mind-set. Thoughts that create a different pattern in our steady life, that force us to stop and reflect, in a moment of reconnection with ourselves, as human being and part of the nature. How magical and refreshing is the place where it is allowed to reconcile with our body and mind?! But, how long can we hold out? There is always a point in which we have to come back to reality. However, what is reality? Is that what society suggests us to be real?

Susan is a composer from United States based in London, UK. Her musical background and studies encompass a wide variety of musical styles, traditions and concepts, influencing the realization of her electroacoustic compositions. Her sonic pieces are intuitively folk, weathered by complex aesthetic influences. She has composed and performed professionally for dance, theatre and film. Her electroacoustic composition, Golden Waves won an award in the MAARBLE Outreach competition "Sounds of Space" which sought to combine scientific and artistic ways of thinking. The ceremony in Rhodes, Greece presented her composition accompanied by projected images of the earth's visible electromagnetic waves. She has been invited a guest composer as part of the London Gamelan Composers Forum, Concert and Discussion of New Music for Gamelan. 'Ears to Earth' was composed for Gamelan and electronics and performed live at the School of Oriental and African Studies (SOAS), London, UK.

Title / Titulo Winding the Bend, Then They Stand Still **Duración / Legth** 02:30

Description of the piece /

'Winding the Bend, Then They Stand Still' takes inspiration from sounds that can be made by everyday household items, combined with conventional and unconventional instruments. The collection of samples forms the alphabet from which vocabulary and phrases grow. Repeating fragments in different settings are an aspect of a conceivable design for a continuum. They duplicate, multiply, shape shift, are arranged and rearranged without becoming fixed in strict patterns. As with language, changing the context of sound transforms the perception and meaning of it. An intuitive and contradictory composition that experiments with the relationship between repetition and stillness, sound that transforms irregularly and unpredictably is like a riddle. The progression is chaotic, but the impression given, implies consistency, serenity and order.

Dr. Yu-Chung Tseng is a professor of electronic music composition at Institute of Music at National Chiao Tung University in Taiwan.

His music has been recognized with selection/awards from Bourges Competition (Finalist, 2005), Pierre Schaeffer Competition (1st Prize in 2003, 3rd Prize in 2007), Cittadi Udine Competition (Finalist, 2006), Musica Nova Competition (1st Prize in 2010, Mention award in 2009, Mention award in 2012), Metamorphoses Competition (2006, 2008, 2010), ICMC 2011 Asia-Oceania Regional Best Music Award and ICMC 2015 Asia-Oceania Regional Best Music Award.

Dr. Tseng's works have also received many performances at festivals and conferences, including ICMC, Musicacoustica (China, Beijing), SICMF (Korea, Seoul), EMW (China, Shanghai), Schumann Festival (Germany, Dusseldorf), ACL(Japan, Israel, Singapore, Phillipine, Taiwan), Musica Nova (Czech, Prague), Taiwan-France Exchange (Bordeaux, Hans, Pairs) and Chengdu International Electronic Music Festival..etc.

Title / Titulo Revealing after Thousand Calls **Duración / Legth** 06:30

Description of the piece /

Revealing after Thousand Calls
-- Acousmatic music for Live Multi-channel Difussion(06:35)

The sound source of the work was mainly drawn from the Chinese plucked Stringed instruments--Pipa.The main ideas of the composition is to abstract and to "white wash" the sound object, to suspend listeners' ears through overwhelmingly sonic transformation. As a result, it's only until the last moment of the piece which the original material was revealed.

The idea of proponing the appearance of original sound source to the last moment of the composition was drawn from a Chinese poem "Song of Pipa" by Po-chui I in Tang Dynasty. In the poem, a mysterious lady Pipa player finally appears after audience 's thousand calls after her amazing performance.

Massimo Massimi

Country / País

Italy

About the author /

Massimo Massimi is born in Rome in 1973 where he lives and works; he studied Renaissance Lute, Composition and Electronic Music. He's a composer who is interested in experimental research about relationship between musical instruments (included computer) and musical symbology with the conviction that musical spelling represents the current compositional request. Its electronic production is oriented to increasing the expressive resources of algorithmical synthesis in order to create specific virtual sounds in which to trace continuous elements of transformation, paying particular attention to temporal perception.

Designs and produces musical instruments with recycled materials and non-conventional electro-acoustic diffusion systems.

Title / Titulo

Superfici

Duración / Legth

7.53

Description of the piece /

SUPERFICI (Massimo Massimi)

Stereo

Duration 7:46 min

"Superfici" is an acousmatic composition based on two sound scenes in a kind of "parallel cutting". The scenes are both progressing towards a complex spectral becoming by an extensive use of different kind of synthesis and FFT analysis/resynthesis starting by inharmonic material. The formal structure can be thought of as three sections even if an internal movement describes a spiral of reworked material returns. The spectral richness of the piece makes it suitable for a stereo reproduction or through clusters of different speakers.

Macarena Solervicens is a composer and sound designer from Santiago, Chile, currently based in Berlin. She has a background in sound engineering from the University of Rome II, and studied electronic music at the Conservatorio Santa Cecilia and sound art at the University of Barcelona. She has worked on film projects featured in international festivals, and also creates electroacoustic music, experimental sound, and sound art. Since 2016, she has been leading interdisciplinary projects that explore the relationship between art, music, and technology. Her compositional approach focuses on the intersection of sound and music, pushing the boundaries of both disciplines to create a cohesive blend.

Title / Título Yo, Caballo **Duración / Legth** 09:00

Description of the piece /

"Yo, Caballo" (Me, Horse) is an electroacoustic piece that immerses itself in the sonic universe of a horse. This work is part of an artistic study aiming to portray and imagine the sonic interplay of other species or inorganic elements within a system. Through this composition, the intention is to transcend the surface-level connection between humans and animals, delving perceptively and sonically into the intricate layers governing communication with other species. By immersing the listener in this piece, the invitation is extended to explore the hidden modes of communication and connection between horse and human. Using a sonic palette characterized by textures, patterns, and dense layers, the aim is to capture the sound codes that transcend human language and draw closer to the animal.

About the author /

Augusto Meijer is an Electroacoustic music composer from the Netherlands.

He received his Master of Music degree at the Utrecht School of the Arts, after successfully completing the European Media Master of Arts degree.

During these studies, he focused strongly on electroacoustic music, and various composition techniques.

His work is performed at various international venues, including the San Francisco Tape Music Festival, the New York City Electroacoustic Music Festival, International Computer Music Conferences, Glow Eindhoven, ZKM and many more.

In 2019, he completed a large-scale acousmatic composition commissioned by Rolling Ryot. The work was presented through an immersive 32-channel speaker setup arranged throughout a five-story parking garage in Austin, Texas. In 2023, Meijer was commissioned for a new large scale multi-channel project presented in Waterloo Park, Austin TX

Title / Titulo Intertwined **Duración / Legth** 13:00

Description of the piece /

"Intertwined" is a 2-channel acousmatic composition that is based on< two percussive sequences generated by frequency modulation synthesis< software.

The sequences are created by using mathematical formulas converted< to a musical rhythm phrase.

Playback of these separate sequences creates an interesting "contrapunt" phenomena.

Throughout the piece, these sequences can be heard in context of a< vast array of deeply manipulated sound phrases that have been derived from the sequences sounding output.

Title / Titulo Te-susabi

Duración / Legth 11:00

Description of the piece /

The title (Te-susabi / 手すさび) is a bit old-fashioned Japanese, which roughly translates to something like "Handwork to kill time." However, the root word "susa" has the meaning of an impulsive act, a spasmodic action. I am taking that into consideration. My hands wrote jumbled programs, then blindly manipulated my DAW, and my ears listened to the results. This repetition. The haphazard process itself is my concern. The root word "susa" also means desolation. It is chaos, a mixture of natural fertility premonitions and political anarchy. The sounds packed into this audio file are not intended to represent any particular passion, concept or story. Rather than sound, it is a representation of sound or a representation of matter, an informal sculpture composed of synaesthetic touch and time.

Title / Titulo Kitchen Stream **Duración / Legth** 10:00

Description of the piece /

This work uses sounds recorded in a kitchen and the sound of a flowing river. One of the attractions of electroacoustic music is the creation of space through sound. The use of sonic materials connects the kitchen and the riverside, which are two different spaces. Although the two are spatially unrelated, the combination of acoustic textures creates new spaces and connections. The compositional method combines the performance of sound instruments being recorded, the manipulation of acoustic processing parameters, and the construction of waveforms on a DAW. The music comprises sections listening to the constructed sounds, soundscapes, stories progressing through acoustic synthesis, and various compositional acoustic events.

He was the prize-winner of the Phonurgia Nova scholarship in 2009, and Hervé Dugardin Prize of the SACEM in 2013. Since 2003, he teaches composition at Conservatoire de Lyon (C.R.R. de Lyon).

Title / Título

The Sweet & Prickly – The Inspired

Duración / Legth

09:00

Description of the piece /

The diptych composed of The Sweet & Prickly and The Inspired is an excerpt from Anthology of Laughter, an electroacoustic work that employs as its essential sound material the laughter from the recordings of three hundred invited participants. The musical writing, based on very precise sound selection, manipulation and editing, brings into focus the timbres, the rhythms and the pitches of this material.

The diptych plays on contrasts: mainly closed-mouthed, restrained and polished laughter in the first part; full-throated, wild, "animal" laughter in the second.

The four verses of The Sweet & Prickly feature the laughter of men, only mouths closed; the four refrains arise when one of the men laughs to the point of opening his mouth.

For The Inspired, various articles on ritual laughter fascinated me: laughing at ceremonies, during sacrifices, etc. – cf. the Roman Lupercalia, or the sacrifice of Isaac (meaning "he laughs") in the Bible.

Title / Titulo VoceST II **Duración / Legth** 03:40

Description of the piece /

All the sounds that form this composition derive from the elaboration of vocal sample. Starting from this very small sample (0.1756 seconds) I tried to change the original characteristics in order to generate a range of sounds more or less different compared to their original variety. This was possible using particular technique of sound processing such as time and spectrum stretching, morphing, harmonisation, freezing and sustaining a sound on an explicitly specified grain, transposing copies of sound on top of one another.

Title / Título Fourth Garden: Exodus -for piano- **Duración / Legth** 10:00

Description of the piece /

The work is made entirely with recordings of a intervened piano and with practically no processing. Starting from considering the piano not as a musical instrument fully integrated into a certain sound culture and tradition, the piece is rather a meticulous investigation into the sound possibilities of the object. The result, as in a carefully arranged garden, aims to be a statement about the construction of an acoustic ecosystem through the modeling of perception and physical and psychoacoustic reactions. Like any garden, this territory enclosed by duration also tends to be a heterotopia: worlds within worlds, containers that contain themselves while also housing all other possible spaces, including Beethoven's piano, Chopin and Prokofiev; in addition to the object detached from its own history.

About the author /

With music “[thriving] in the sustained tension, like the kinetic energy emanating from the corners of a frame, the opposing forces holding up a house” (Musicworks, 2022), Toronto-based composer Juro Kim Feliz studied composition at the University of the Philippines and McGill University under Jonas Baes and Melissa Hui. Winning the Goethe Southeast Asian Young Composer Award (2009), Feliz has presented his music across Southeast Asia, North America, and Europe with artists including Continuum Contemporary Music, Liminar, Ensemble x.y, Marilène Provencher-Leduc, Wesley Shen, and Renee Fajardo. He received a “Highly Commended” distinction at the Ars Electronica Forum Wallis (2018) and was nominated for the “Excellence Award in Music and Entertainment” at the Golden Balangay Awards (2019) in Canada. Releases include “Hanggang sa Takipsilim” in “Mind & Machine Vol. 4” (Ravello Records, 2022), “Gandingan sa Kagiliran” in “Millennial Masters Vol. 7” (Ablaze Records, 2017), and synth-pop releases as “Grumpy Kitty Boy.”

Title / Título Kinalugarán **Duración / Legth** 19

Description of the piece /

Derived from “lugar” (Filipino/Spanish: “place”), “kinalugaran” refers to the site where an object is placed. Common contexts imply that one should know their place in society, an emphasis on social harmony among Asian communities. As a result, assertive voices among first-world societies are most heard at the expense of silent people, othered and rendered invisible.

“Kinalugarán” highlights this condition at the forefront. An audio essay features Filipino artists based in first-world diasporas: violinist Ramon Alfonso Soberano (Tempe, AZ, United States); film composer Marie-Luise Calvero (Freiburg, Germany); and theatre creator Riley Palanca (Montreal, Canada). Weaving through juxtapositions of Tagalog poetry, they narrate their perspectives surrounding invisibility, integration, and homelands over soundscapes of found objects, musical instruments, and Philippine indigenous instruments by Jayson Palolan.

Commissioned by New Music Concerts (Toronto), the creation of “Kinalugarán” was made possible by the support of the Ontario Arts Council.

The ONEIROS Collective was born in March 2016 on the occasion of the staging "Poemas à la Source" in Paris, France.

We are a collective of 4 artists, Ana Lara (composer), Jean-Pierre Prost (light designer), Harry Kampianne (poet) and Daniela Prost (plastic artist and video maker). Our goal is to unite and create a symbiosis between our artistic disciplines. Build different dimensions and fields of work in constant emulation and thus create new plastic and sound universes.

Title / Título

Rêves Urbains

Duración / Legth

07:00

Description of the piece /

Rêves Urbains is a poetic and sound video made by the ONEIROS collective.

Everything happens through the dream and this only becomes reality after having been a product of the imagination. Our urban dreams are assimilated to architectural spaces, to microclimates that are both futuristic and realistic, thus underlining the importance of the habitat in the human imagination. Following a character through the city of Paris, reality and fantasy mix and invite us to dream.

In "Sueños Urbanos" the music by Ana Lara, the images by Daniela Prost and the poem Asphalt Song by Harry Kampianne interpenetrate and lead us progressively towards other visual fields capable of catalyzing another reality or other realities capable of interacting with the viewer.

Rêves Urbains is a video of interconnections between the human, the habitat and the environment, essential factors for life.

Her works have been commissioned, programmed, and performed at different festivals, cycles, and composition residencies in Latin America.

Title / Título

¿Dónde está el espacio para el eufemismo del amor? 09.53

Duración / Legth

Description of the piece /

Where is the space for the euphemism of love?

It establishes a dialogue of hybrid resources between voice, electronics and video, explores the limits of timbre, dynamic and rhythmic saturation and interacts with the degrees of color purity, generating a chain of sound-visual objects that vary in their micro and macro form, nourished by the timbre of the voice, in which the word is the guiding thread, giving it meaning and coexisting with each other to create a single compositional discourse.

Inspired by the poem "...and suddenly", by the poet Victoria Tobar, the text is dismembered in the time line, creating monosyllables that little by little make sense until they meet the word, the phrase, the poem. .

About the author /

Juan Carlos Vasquez (www.jcvasquez.com) is an award-winning composer, sound artist, and researcher. His electroacoustic works are frequently performed worldwide, having premiered in over 30 countries across the Americas, Europe, Asia, and Australia.

As a researcher, Vasquez's writings can be found in the Computer Music Journal, the Leonardo Music Journal, and proceedings from leading conferences in the field. Vasquez received his education from the Sibelius Academy (FI), Aalto University (FI), and the University of Virginia (US). Babel Scores publishes his scores, and his music is distributed by Naxos, MIT Press (US), Important Records (US), and Phasma Music (Poland). Vasquez is sponsored by Genelec (FI) and is a member of the Society of Finnish Composers.

Title / Título Dorep Ampora **Duración / Legth** 06.35

Description of the piece /

"Dorep Ámpora" is an audiovisual piece for percussion and electronics. The piece's name is a reorganization of the characters contained in "Pedro Páramo", a novel by Mexican writer Juan Rulfo. Pedro Páramo is the "story of a town that was destroyed after submitting to the rule of Pedro Páramo, a despotic leader. In the novel, multiple stories blend, and the narrative line does not unfold in a precise chronological order. Instead, three main guiding structures generate a type of narrative that is associative, rather than chronological.

In "Dorep Ámpora", the percussion performer(s) plays three-part guided improvisations reacting to graphic scores. Each performance is required to be recorded, and the composer digitally reconfigures the resulting audio and video into the final, layered audiovisual piece.

Name / Nombre Dallas Herndon

Web page <https://dallasjherndon.carrd.co>

Country / País United States

About the author / Semblanza del autor

Dallas J. Herndon (b. 1994) is a composer, researcher, educator, and interdisciplinary collaborative artist. He holds a B.M in clarinet performance and music theory (with a minor in jazz studies) from Newberry College (Newberry, S.C.), and a M.M. in music theory and composition from East Carolina University. He recently completed his Ph.D. in music composition at the University of Utah, and taught courses in the areas of music theory, musicianship, and music technology. His creative interests integrate concepts of relativism, perspectivism, and environmentalism in music, and experiment with how changes in our perceptive experience might affect our understanding of meaning and identity. His works are often inspired by issues and phenomena found in our natural environment, and seek to challenge and bring awareness to how we understand and perceive our environment as human beings.

Title / Título Muted, Hear No Echo **Duración / Legth** 05:00

Description of the piece /

"Muted, Hear No Echo" is inspired by the environmental issues of noise pollution and modern industrialization. This work uses field recordings from urban areas and combines them with sounds of nature. Specifically, the musical material uses a variety of owl calls to express the dangers of noise pollution to owl species that rely upon natural communication for their survival, such as the Mexican Spotted Owl that can be found in Zion National Park. The solo trumpet functions as a personification of the owl call and is generated through the conversion of the owl call field recordings into MIDI to determine the initial pitch material. It is then further altered with various timbral techniques and other electronic effects. The choir functions as a disruptive catalyst of the "noise" element, ultimately dissipating and polluting the owl's capacity to communicate effectively, by the movement's end.

Starting from 2019 he is curator of MA/IN Festival, an international festival for digit and multimedia arts.

He is professor in electroacoustic music composition at Conservatorio Statale di Musica "Giuseppe Verdi" in Milan.

Title / Título

Autumn of the Nations

Duración / Legth

03.00

Description of the piece /

November, 9 1989: thousands of East Germans take to the streets forcing the gates in front of the powerless guards at the checkpoints; on the other side of the wall, the West Germans welcome their brothers with open arms.

The images of the fall of the Berlin Wall, as well as a few months before those of the unknown insurgent with plastic bags that challenges a column of tanks in Tiananmen Square, have indelibly sculpted our era.

After many years from those events, a period known as the "Autumn of Nations", a short film to celebrate, as well as a pretext for a bitter reflection: after more then thirty years, geographical maps and mental borders have been redesigned in favor of a globalization that doesn't take count of the history and continues to raise walls in the name of divisions and political aspirations.

He holds a DMA in Composition from Boston University, where he studied with Joshua Fineberg thanks to a Fulbright grant. Described as one the 'most powerful Chilean voices born in the 70's and 80's' [El Mercurio]. He is an Associate Professor and dean of the Faculty of Arts at Universidad Austral de Chile. He takes inspiration from various sources, including visual arts, literature, films, daily life, and the natural world.

Title / Título

Memoria 新庄 24-1

Duración / Legth

27:00

Description of the piece /

This project originated after the initiative of my friend flutist Cheng-Yu Wu, who in 2017 invited me to Taiwan to create an open work. We did not plan much and our only guide was that the protagonist of our collaboration would be the house of his family located in 新庄 [Xinzhuang], space where no one lives anymore.

This house is located in a rural area, which is currently under a process of industrialization. Some traditional houses like this one —of progressive construction— have received government support for their preservation, but the selection criteria are linked to size, prioritizing houses which completed a square around a central courtyard. This policy has left some houses —like this one, which only forms an L on the floor plan— out of conservation programs. During three days, we took photographs, filmed and recorded sounds of the house and its surroundings to create this audiovisual memory.

About the author /

He began his musical studies in 2015 at the Morelense Center for the Arts as a jazz guitarist, under the tutelage of Mtr. Leonardo Requejo Blunno. Later, in 2018, he entered the classical musical composition career at that same institution; initially under the tutelage of Dr. Mariana Villanueva Conroy and, later, under the tutelage of Mtra. Judith Alejandra González Benítez, concluding her undergraduate studies in December 2022.

The composer has participated in the workshop given by the Swiss duo UMS n' JIP, held at the IV Encuentro Revueltas Sonoras (2019) at the Centro Morelense de las Artes. In addition, it has been the winner in different calls for festivals, such as the Aires Contemporary Music Festival (2021 and 2022) and the third edition of the Atemporánea International Festival (2022).

Title / Título

Tus eternas heridas abiertas

Duración / Legth

4

Description of the piece /

"Your eternal open wounds" is an electroacoustic work with video, which revolves around the detachment of humans from nature. This piece is a representation of how our reality today is constituted from incessant machine noise and self-absorption on the part of people, neglecting nature and resulting in its punishment. The lack of awareness towards caring for nature today is what motivates the composer to address this issue and, through music and the visual part, contribute to raising awareness of it.

Title / Título Esculturas temporales **Duración / Legth** 753

Description of the piece /Descripción de la obra

Esculturas temporales (2022)

La obra se dispone como un continuo de fragmentos sonoros que buscan construir diversas formas de esculpir el tiempo; diversos gestos; diversos caminos de acumulación y distensión de energías. Esculturas temporales, compuesta exclusivamente a partir de muestras de contrabajo, toma el sonido como material moldeable, y se propone esculpir sobre él tal como si pudiéramos asirlo, tomarlo, sentirlo con nuestras manos. En definitiva, es un intento en vano de hacer tangible un material efímero como lo es el sonido, del cual no podemos constatar más que la experiencia temporal y espacial que nos deja su fugaz presencia.

**About the author /**

Filipe Borato is a composer from Curitiba who is interested in music and technology. He currently resides in Luxembourg and has some independent work in this country. He studied composition with Maurício Dottori and Roseane Yampolschi at the Federal University of Paraná and has a degree in electrical and electronics engineering with a focus on audio. His instrumental training is mostly self-taught, although he had popular piano lessons with Danilo Ramos and Santiago Beis. He is part of the electroacoustic music specialization course at the State University of Paraná, which has good teachers in the field. His full-time work today is writing code, but he always tries to escape and focus on music. The composer's three most important electroacoustic works are called Prataria 1, 2, and 3.

Title / Título

Um Amontoado de Gente

Duración / Legth

08:05

Description of the piece /

"This is a jungle, there's no state, there's nothing, it's just a veneer. We're not a people, we're Um Amontoado de Gente. It took me years to realize this." The owner of this statement is Guiga, a philosophy professor and broadcaster, who was brutally beaten and murdered exactly two years ago in Curitiba, Brazil, after uttering this phrase. This piece is a tribute to this great friend and an expression of my disgust for this city. I use a single voice to create the entire piece, with snippets of audio excerpts from Luciano Berio's Sequenza III. Implementing the DDSP deep learning algorithm, I perform resynthesis using human voice data to transfer the timbre to other instruments synthesized through machine learning techniques. The variation created by the manipulated elements generates an interesting gestural result, with melodic phrases and different timbres.

Country / País Italy

About the author /

Matteo Tundo is an Italian composer of acoustic and electroacoustic music. His primary interest in composition is the perception and cognition of the sound event, the neural mechanisms that lead to the signification of sound. His work is focused on the application of neuroesthetics in musical composition. After his first guitar studies, he devoted himself totally to composition and new technologies, studying at the conservatories of Florence, Parma, Lugano and at the Accademia Santa Cecilia in Rome. His compositions have been played in Italy, Germany, Portugal, Spain, Greece, Switzerland, Austria, United States, Iran, Korea, Japan, Australia, Hong Kong and he participated as composer in international festivals. His compositions have been awarded or recommended in international competitions. His works are published by Edizioni Sconfinate. Since 2020 He has been teaching electroacoustic music in Italian conservatories.

Title / Titolo Reciso **Duración / Legth** 10:00

Description of the piece /

This piece is composed of gradual and slow sound transformations. These evolution zones are abruptly severed at different points, with the intention of exploring the perceptual impact of acoustic fractures. In particular, the idea of spectral fragmentation is developed, each time focusing on different areas of the spectrum, while the overall structure continues its development. The entire piece is therefore developed with contrasting elements, on the one hand a coherent and directional sound evolution, on the other sudden cutting events that destabilize the temporal flow of the composition. In this sense, the piece is part of a broader musical tradition, in which the idea of contrast and tension has been explored through different compositional techniques. However, the cuts always act as junction points from which new transformation zones start, thus building a rhizomatic form.

Title / Título

non-Human

Duración / Legth

12:00

Description of the piece /

"non-Human" es una obra que presenta la creación de un lenguaje posthumano a través del análisis del poema sonoro UrSonate de Kurt Schwitters y su transformación en un nuevo lenguaje cyborg formado por los fonemas utilizados en la obra "Alienación". La pieza utiliza la sonificación de fragmentos de este nuevo lenguaje y presenta una segunda capa basada en texturas de vocales que transicionan lentamente a lo largo del esquema seccional. La obra es estática y lenta en general, con momentos de energía que se autorregulan. La pieza plantea una metáfora de interacción entre el ser cyborg, la tecnología y la naturaleza, donde la modulación funge el papel de alienación entre las fronteras del lenguaje humano con el objetivo de establecer un diálogo entre las partes.

Title / Título Nebula **Duración / Legth** 09:00

Description of the piece /

The name of the electroacoustic work Nebula alludes to The Spirograph Nebula. In this ellipsoidal cloud, the trajectories or currents of matter trace spirographic eddies. This spirographic structure organizes the texture and spatiality of the work. For the composition of the octophonic work, the compositional and analytical criteria developed by Panayiotis Kokoras and Gary Kendall are used as formal, sound, textural and spatial construction procedures.

Panayiotis Kokoras with the concept of Morphopoiesis refers to instrumental, vocal and electroacoustic music that focuses his interest on the internal and external attributes of sound through time. He alludes to a general procedure for structuring musical form and is mainly related to timbre.

The spatiality of sound is raised from the analytical approach proposed by Gary Kendall. This approach allows the study of the transformation of sound material and the disturbance of spatial schemes.

Mayer studied composition with Isabel Mundry at the HMTM Munich, Stefano Gervasoni at the CNSM de Paris (within an Erasmus exchange 2015/2016) and with Martin Schüttler and Joanna Bailie at the HMDK Stuttgart. Mayer has worked with the Tokyo Symphony Orchestra, Trio Abstract, Duo2KW, Quartetto Maurice, Petra Hofmann, Ghenadie Rotari and many others. His music has been presented at festivals such as the Munich Opera Festival, the Suntory Summer Festival Tokyo, the Munich Biennale, the Evimus Festival Saarbrücken, the Symposium Performing Voice (Bern), the Alte Schmiede Vienna, the Scène National d'Orléans, Delian Music Academy (Mykonos), Festival Contemporeanea Ponferrada (Leon, Spain) or the Mozart Festival Würzburg. Mayer spent residency grants in the Künstlerhaus Schluss Wiepersdorf and in the residence of the Beethoven Haus in Bonn. In 2016, his artistic work was awarded the Main-Kinzig District Cultural Promotion Prize.

Title / Título

Habitat

Duración / Legth

05:28

Description of the piece /

Habitat is a piece somewhat inspired by a personal experience: a car trip where I didn't know where exactly we are going, how long it will take and how I would get to the place I wanted to be in the next morning. That put me in a weird state of mind where everything seemed at the same time painfully fast and slow.

I was interested to see what that could mean as some sort of musical etude. What came out is an overwhelmingly active, fast moving music that at the same time, due to its repetitiveness, has a static quality. On a sonic level, I experimented with combining highly digital sounds and organic textures, which you might also hear on the level of montage (rough digital cuts | fades and joint gestures of different sounds).

About the author /

SCHOLARSHIP from the National University of Quilmes, he received the following titles: Diploma in Technology and Music, Musical Director with Electroacoustic Techniques, Bachelor's Degree in Composition with Electroacoustic Media and attended various seminars and postgraduate courses on artistic and technological specialization, being awarded the Diploma of Academic Merit in recognition of the best Averages.

SCHOLARSHIP from the COLLEGIUM MUSICUM of Buenos Aires. He studied Chamber Music, Piano, Audiperceptiva, Percussion Ensemble, Choir, Harmony, Music Appreciation, Recorder and Transversa, Piano, etc. with the Masters Antonio Yepes, Gustavo Samela, Ricardo Graetzer, Guillermo Graetzer, Ernesto Epstein, Carlos López Puccio and Pablo Levín.

Title / Titulo

Babel 4

Duración / Legth

11:00

Description of the piece /

The piece is made up of three sections and the audio used comes from different sound sources. These are: a piece for cello written by the composer Xenakis; materials from conventional instruments such as cello, piano, guitar and sounds produced by later processed objects as well as electronically generated sounds, as well as quotes from a Work composed in collaboration with other colleagues from the First Group in the Poliedro System coordinated by the composer Fabian Luna .

tes in the Music of the 20th century, for its subsequent work according to the expressive needs of the Work. It is also worth noting multiple sources of traditional instruments treated with extended techniques and various noise-producing objects.

Due to a reported emergency would all passengers leave the station immediately

Duración / Legth

3.22

Description of the piece /

is based on a recording I made in Green Park station. Green Park station is a busy London Underground station. It consists of 2 side connected by a tunnel. One day when I was heading to my choir rehearsal, the station was extra busy and had become overcrowded. An announcement was broadcasted to evacuate the passengers. At the time I thought something more serious had happened and as I made my way through the long and packed tunnel I decided to record my journey to the exit of the station. The more I listen to the recording, the more interesting sounds my ears picked up and I decided to orchestrate the interesting moments using additional recorded violin and flute sounds.

MUSLAB 2023

Name / Nombre Paolo Montella

Country / País Italy

About the author /

Paolo Montella is an electroacoustic composer, multi-instrumentalist, and programmer. Field recording and radical improvisation practices are central to his aesthetic. He focused his research on the relationship between sound and source, meant as a complex phenomenal system. His education arises from both self-taught and academic experience. He studied piano, harmony, and classical composition, moreover, he started studying electroacoustic and electronic music while deepening his knowledge of C-based programming.

He graduated in Electronic Music at the Naples Conservatory with M° Elio Martusciello. Since 2016, as an inhabitant of the Ex Asilo Filangieri in Naples, he has been curator of "Geografie del suono" which has hosted prominent artists from around the world during more than 70 appointments.

His works have been performed in festivals such as Sonic Cartography (Chatham, UK), XIII CIM (Ancona, IT), Interferenze (IT), Supersonique Festival (Marseille, FR), Martini Elettrico (Bologna, IT), Fixed Room - Tempo Reale (Firenze, IT).

Title / Titolo Ossa **Duración / Legth** 07:00

Description of the piece /

"In this world which we enter, appearing from a nowhere, and from which we disappear into a nowhere, Being and Appearing coincide"
Hannah Arendt, Life of the mind

Field recording, as an operation determined by rituals, times, and techniques, qualifies for its non-exhaustive character by releasing the need to be artistically varied. Thus escaping the source into the source itself. In this perspective, the world seems to arrange itself as a true musical paradigm that dictates its syntax, its connections, and its structural functions.

In this work, field recording is grafted onto the practice of interviews. Agata, an 11 years old girl, shows us her field – stark – at the center of tense and contradictory forces, between her being a child, wanting to become a woman, her aspirations, and social impositions. Her strength is disarming, and the tone of her voice is exceptionally beautiful.

Simon Hutchinson is a creator and teacher of music, audio, and things tangentially related.

His work synthesizes disparate ideas—European concert traditions and creative electronics; acoustic musical instruments and digital video games; East Asian folk and American jazz, rock and funk—and these combinations yield novel musical experiences, engaging with the relationships between humans, technology, and society.

Simon holds a PhD in Composition with supporting coursework in Intermedia Music Technology from the University of Oregon, and he is currently Associate Professor of Music at the University of New Haven

Title / Título Hiraizumi Memories **Duración / Legth** 03:12

Description of the piece /

Hiraizumi, a small town in Northern Japan, is home to a collection of Buddhist temples nestled in the hills of a picturesque rural landscape. These temples, dating back to 850 AD, were declared a UNESCO World Heritage Site in 2011. A place must meet several possible criteria to become a World Heritage Site, and the "Historic Monuments and Sites of Hiraizumi," was accepted under criteria ii, "exhibits an important interchange of human values...on developments in architecture or technology, monumental arts, town-planning, or landscape design", and vi, "is directly or tangibly associated with events or living traditions, with ideas, or with beliefs, with artistic and literary works of outstanding universal significance." These temples stand, then, as a possible conduit to the past, but a place that is connected to living traditions that continue to be shaped by the modern world.

Schichtungen

Duración / Legth

5

Description of the piece /

Schichtungen
fixed media (stereo)
Duration: 5:28
Composed in 2021

Schichtungen (German, means stratifications): vertically layered sounds condense into signs with individual characteristics. These signs, in turn, are layered into each other and one after the other. In this way they interact with each other: they meet, merge, detach from each other. Relationships are established and dissolved again in different constellations. Encounters and events structure the course of time. Just like in real life.

About the technique: the individual sounds, except for the vocal sounds, consist of superimposed layers of repetitive sound particles. Each layer has a different repetition speed, with the speeds in prime ratios to each other. The choice of layers, their density, and the acoustic source material of the sound

France

About the author /

He was born in Havana and is a member of the Cuban Musicians Association. He resides in France where he has specialized in the interpretation of electroacoustic music, in particular mixed. With saxophonist Daniel Kientzy, for the concert performance of what he conceptualized as "meta-cameralidad", he developed the Enneaphony. Commanding this device as a "sonist", in Meta Duo, he has toured a large part of the planet, performing concerts and guaranteeing the creation of more than 200 works. He has released several records in France and on foreign labels, participated in radio and television programs, and taught courses and lectures. Parallel to his work as an interpreter, he is dedicated to composition, especially electroacoustic music.

Title / Título

Eclipse

Duración / Legth

7

Description of the piece /

Conceived as an acousmatic work, I used specific sounds from Daniel Kientzy's family of 7 saxophones (techniques described in "Saxology" and precise monodic musical phrases). I didn't manipulate the sounds; I got the abstract-concrete result I was looking for. I chose this singular instrumentalist, with a predilection and taste for electroacoustic music. Timbre and purity of sound have been his constant concern. Creator of the Enneafonía for the concerts of what he considers a «meta-cameralidad» and with more than 300 premieres, he is the quintessential interpreter of the genre. To Marie Thérèse, who left us orphans on the day of the eclipse, the equinox, the new moon, in the period of rushing waters, on the eve of the Tide of the Century... The sky blackened to hide our helplessness.

During lockdown, her collaborations with the APRA award-nominated HiberNATION festival include a series of solo and collaborative livestreams and an avant-garde Minecraft sound installation. She will curate its upcoming third season.

She also co-curated Konzertprojekt's 2022 concert series Sound Stories in partnership with the City of Sydney, for which she created an audiovisual work, 'August Underflow', with visual artist Keesha Field.

Title / Titulo

Lat

Duración / Legth

20

Description of the piece /

Late Night Swim borrows its sonic material from organ and piano recordings from my score of Eulogise Me, directed by Columbia University masters student Alex Bateman. This work becomes completely distinct from the score, processed through Max/MSP in different manners from its source material - granular synthesis, delays and loops, gathering artefacts from the software.

It became a new way of looking at musical material for me - rather than becoming static in its position in a piece of music, a sound can live and breathe beyond its original treatment.

Inspired by late night walks through Sydney, the work also has lately become a study for me in how music functions in its environment, seeping into the empty space and filling its container like water - how different elements of a fixed recorded become ascribed to site-specific elements of whatever environment it's heard in.

Covid-19 Sound Stories

Duración / Legth

36

Description of the piece /

Northern Ireland has faced unprecedented challenges during the past two years due to the COVID-19 pandemic. Multiple lockdowns and strict public measures were implemented to protect the health and safety of the community. To gain insight into the perspectives of students in Northern Ireland, a set of questions was asked to capture their thoughts and feelings on the impact of the pandemic and the changes they have experienced. These questions also explored the powerful connection between sound and memory, highlighting how individuals relate to their environment and how sounds evoke memories of significant moments.

He is a music director of Ensemble SONOR XXI since 2015, and has been studying composition (Postgraduate degree) at the HfMDK Mannheim since 2021.

Title / Título

[əsu:reɪ] for fixed media

Duración / Legth

8

Description of the piece /

Humans feel comfortable in nature. However, this can also happen in a form modified by man. Humans shape nature according to their aesthetic demands; the Schwetzingen Palace Park is a wonderful example of this baroque tradition. My work focuses on dressing various sounds of nature that can be felt and heard in this park in an artificial garment. To do this, I use two prepared grand pianos on which I reproduce these natural sounds and then process them electronically. In this way, I go through a similar process on a musical level as the architects of the baroque palace garden. The idea of artificial naturalness becomes the core idea of this work.

About the author /

Holly Gowland originates from Manchester, UK and currently lives in Birmingham, UK. Within her compositions, blending acoustic and electronic sounds and tuning into the environment becomes paramount. She often builds new technologies to facilitate harmonic blending and highlight spectromorphology. Her work usually consists of field recordings and draws special attention to spatial aspects. Holly won the Peter Redfearn Prize for Composition in 2019 and has been commissioned by NMC (New Music Cassette). She has just finished studying BMus Composition at Royal Birmingham Conservatoire supervised by Andrew Hamilton, Emma Margetson and Joe Wright. She will begin an MST in Composition at the University of Oxford in October 2023. Her current research focuses on the effect of urban noise on sound practices. Gowland's music has been performed at (to name a few) the International Saxophone Festival, sponsored by Yamaha, Centrala and soon will be performed at the Royal College of Music.

Title / Título

Geo-Bio-Anthro

Duración / Legth

7.5

Description of the piece /

I wanted to find the means in which connects geophony, biophony and anthrophony, as termed by Krause. The relating factor between all three was air, whether that be breath or wind. The piece has two main sections: fast, fragmented sections of biophonic or anthrophonic sounds (section 1) and slow geophonic soundscapes, which have the support of breathing (section 2). Two types of relationships support the means for juxtaposition between samples: they either share a timbral or spectral similarity or they have a metaphoric connection (e.g. cat and tiger). As the piece progresses, granulation, particularly on speech samples, takes over the long geophonic sections (section 2). Granulation allowed me to draw a connection between the timbral qualities of wind and speech samples. I offer windows of fragmented sound between these granular builds to summarise the inter-source connections. Breath and wind draw a close to the piece, as they relate all samples.

He is co-founder of the association 'AUDIOR' (www.audior.eu).

Title / Titolo Pari

Duración / Legth 8

Description of the piece /

Pari is inspired by ritual-type ceremonies and, more generally, by those practices which, by modulating the quality of listening, aim to draw on particular dimensions of experience. Pari has a linear-cyclic trend that develops over six tracks and is based on the repetition of an ordered sequence of 13 female voice samples, immersed in electronic sounds. The samples include words of the Italian language and meaningless vocal expressions, of an emotional type: Prati, Con, Gheu, Pari, Oss, Alti, Se, Sol, Boi, Mmhs, Ella, Za, Onde. The words and vocal expressions are accompanied by the melodies of a synthetic instrument. The use of electronics is present both in the use of textures and in the use of punctual intervention tools. The repetition of the vocal samples creates a sort of temporal suspension and causes the attention to move from the meaning of the words to the emotional charge of the voice.

He has participated in composition courses such as MANIFESTE at IRCAM, in Paris; Brevard Music Center, USA; CASMI in Prague, Czech Republic; ISAM in Michelstadt, Germany and at the AMERICAN CONSERVATORY in the Palace of Fontainebleau, France.

His works have represented Mexico in the 57th and 68th INTERNATIONAL ROSTRUM OF COMPOSERS of UNESCO. She also, with the support of UNESCO, was a composer-in-residence at the VCCA.

Title / Titulo

6 etudes electroniques

Duración / Legth

07:00

Description of the piece /

The work contains particular techniques with precise relationships between sounds and therefore musical elements are developed as the main point.

Techniques used:

Study 1: Micro-montage- Long sounds in order to create fragmented sounds, isolated or in sequence between them.

Looping: repeated copies of sounds with dif. slightly different manipulations

Study 2: Moving Particles/Building- Short, densely textured sounds governed by global motion

Study 3: Figure-Background- The relationship between musical figures and foreground, medium plane and background.< Study 4: Explosions- Active profile of sudden, dense energy that rapidly decays.<

Fragmentation: abrupt editions, cutting fragments of a bigger sound

She obtained her bachelor's and master's degrees in musicology after which she entered the electroacoustic music class in Nice. She travels to the United States to study at CalARTS with Morton Subotnick. She graduated in electroacoustic composition from the Conservatoire National Supérieur de Musique et Danse de Lyon. She has lived in Mexico since 1998. She is responsible for the electroacoustic workshop at the Escuela Superior de Música and was coordinator of the Composition Academy at this school. She was part of the teaching staff of the Cenart Transdisciplinary Diploma "Transits". She was co-organizer of the electroacoustic music festival "Sismo 04".

She obtained several scholarships from Fonca as well as Ibermúsicas. She is currently part of the National System of Art Creators in Mexico.

She is particularly interested in composing for mixed electroacoustic music, acousmatic pieces, reflecting on music with its relationship with space and as performance art.

Title / Título La selva ya no Suena **Duración / Legth** 08:00

Description of the piece /

Fictional soundscape based on samples recorded in the Costa Rican jungle.

Based on an article I read several years ago about the sounds of the jungle that are becoming extinct, La Selva ya no suena proposes to gather some samples of sounds from the jungle that fortunately still sound.

In 2018 I was invited to the Mujeres en la Música festival (Universidad de Costa Rica-San José) to present one of my soundscapes. Then I took a short trip to this marvelous country due to its highly varied and well-preserved ecosystems.

Name /Nombre Guillaume Loizillon

Web page <http://loizillon.paris/>

Country / País France

About the author /

Guillaume Loizillon lives and works in Paris. He has always been attracted by diverse experiences and vast artistic fields. Electronic music, improvisation, sound poetry, sound installation, etc. He has collaborated with artists such as Merce Cunningham, Barney Wilen, Joel Hubaut, Hector Zazou and Bony Bikaye among others.

He is a senior lecturer in the music department of the University of Paris 8.

In a master's degree, of which He is one of the founders, he teaches the creative techniques and the aesthetic of sound creation and organizes a seminar on encounters between music and other arts.

His discography contains more than 15 references. The recent reissue of Zazou bikaye CY1's "black and white" LP, recorded in 1983, has been reviewed in the international music press.

He also co-founded an independent label, TRACE Label, specializing in electro-acoustics, sound art and improvisation.

Title / Titulo Longue distance **Duración / Legth** 08 38

Description of the piece /

Longue distance is an acousmatic piece designed and realized in 4 channels. The material consists of synthetic electronic sounds made with the Max or Pure Data software. These are mainly harmonic or inharmonic drones that gradually change. The second major sound category is composed of moments of piano transformed in real time extracted from a recording of a musical radiophonic creation broadcast on France Musique channel. Longue distance evokes wide perspectives; those that let glimpse and imagine the very far of the landscape. The progressive mutations of the electronic sounds and the fog of the effects, which surround the piano, indicate an itinerary which is prolonged and whose long distance leads to an attitude of floating daydream. The quadrasonic space is thought to reinforce the immersion effect, which would be that of the imaginary of great spaces.

He studied composition and electronic music at the Conservatory of Venice and sound art at the University of Barcelona. Since 2015 he has joined SaMPL - Sound and Music Processing Lab, a distributed infrastructure for education, research and production based in Padua, Italy. As a technologist, Scordato has written articles and presented research results related to interactive systems for music performance and graphic notation in conferences and lectures. Coordinator of the Electronic Music School of the Conservatory of Padua, since 2020 he has held the chair of electroacoustic music composition. His award-winning electroacoustic and audiovisual works have been performed and exhibited in international festivals and institutions around the world.

Title / Titulo Study for a cosmic city **Duración / Legth** 7

Description of the piece /

"Study for a cosmic city" is an audiovisual work inspired by a utopian urban planning proposal exposed by the composer and architect Iannis Xenakis in an essay entitled "La ville cosmique" (1965).

In an attempt to relate computer graphics to the formalization of sound, the structures that characterize the utopian city are designed using superquadratic curves capable of describing reasonable variations in amplitude and pitch. Parameter values extracted from buildings and paths are used to process sound materials from unidentified radio transmissions actually received around the world. In the graphic representation, each building transmits a specific radio signal whose quality and intensity depend on the position of a cursor, also interfering with the other sound sources. Paths on the ground, on the other hand, define the macro-formal articulation of the audiovisual work as well as the virtual localization of the processed audio signals.

TAFAIL تفاعيل

Description of the piece /

TAFAIL (تفاعيل) is a piece for piano and tape, based on the sixteen vertical axes of Arabic poetry, translating their subdivisions into music, profoundly examining the rhythm of weighted Arabic poetry, and the division of poetic verses, and linking the classical Arabic language with classical Arabic music by modeling poetry subdivisions in Arabic musical phrase, and introduces the piano as a contemporary Arabic instrument.

In the recorded Tape, we can listen to poetic, melodic, or spoken phrases, as well as recordings of Arabic instruments and electronics, in an attempt to adapt contemporary music to serve Arabic musical ideas.

About the author /

Wadi Samir Abou Diab, an artistic visionary hailing from Lebanon, draws inspiration from his double cultural background in Arabic Levantine and Western classical music. He was born in Lebanon in 1991 and graduated from the Lebanese National Higher Conservatory of Music (LNHCM) in Piano and Music Composition. He is currently pursuing his Master's degree in "Musicology of tradition" at Antonin University. The international music community has recognized him through numerous accolades from several competitions, as well as receiving honorable mentions and being selected for various calls for scores

Country / País Georgia

About the author /

Elene Aladashvili is a Georgian singer and composer, who has just graduated from the Tbilisi State Conservatoire. Despite having a background in Classical music, her art projects always differ from one another and tend to combine different genres and aspects of music, by experimenting with the synthesis of modern technological perspectives and the legacy of past centuries. She never declines to face new challenges herself, be it writing music for movies, video games or experimental live performances using MAX/MSP. At the moment she is working on her first autobiographical album called "Shattered Memories", that will convey in musical form the reminiscences and emotions of her past through merging of various music genres.

Title / Titulo Dormition of the final light **Duración / Legth** 5.47

Description of the piece /

An experimental piece depicting our beautiful cosmic universe and our home planet that is soon doomed to be destroyed by neglectful human-beings, who always try surpass the cosmological power and become dominant over every inch of matter.
Dormition of the final ligh is a symbol of fading hope, acceptance and mourning. The catastrophic siren letting us know about the fatal death, the death that is happening alone, in darkness, without anyone realizing it...

The Piece can be divided into 3 parts:

- A calm gentle breath and singing accompanied by water drops and rain sound, soon followed by an unsettling tone in voice, the harmony foreshadows the feeling of the unavoidable catastrophe,
- Rattling, banging, Alarms, sirens, mourning voices are there to witness and acknowledge the failure of mankind ,
- Mourning and Acceptance – engraving the memories of the once beautiful universe

Richard McCormick is a composer, visual artist and sound designer who recently graduated from the Music Composition MA at The University of Sheffield. Working mostly as a composer in Film & TV, he also has credits as a sound designer, mixer, music producer, songwriter and video producer.

With a wide range of specialisms, recent projects include original scores for 'Fishponds of the Amazon' (2021), 'Introspectum Motel' (2021) and an original electronic piece entitled 'These Lights' (2021). Recent visual works include various music videos, visuals for 'Threshold music festival' (2017) and exhibition pieces for 'Arkade Film Festival' (2017). His most recent work is a collaboration piece 'Water Forms' with local Sheffield artist Alison Churchill which involves sounds incorporated with a water-inspired paper sculpture.

Title / Título

GeoSonic

Duración / Legth

6.37

Description of the piece /

GeoSonic is an audio-visual piece that takes sound from the earth, and other materials and creates visual representations of them with the use of an Oscilloscope. The piece is inspired by the sound recordings and exhibitions of Chris Watson as well as the audio-visual work of Ryoji Ikeda. Having discovered both during my time in London, I was fortunate enough to interview Chris Watson about his approach to sound recording and his work as a sound artist. Conceptually, the piece is aimed to highlight the fragile nature of the Earth, how each day more and more erodes away. There is a point at which each section breaks or fades to nothing. This is an intentional choice to emphasise the scale of what we are loosing and have already lost.

He is currently pursuing a Ph.D. and teaches intermedia studio at the Anglo-American University. Additionally, he serves as the president of the Swedish art organization Föreningen Musikspektra T.

Petr is a new media artist from the Czech Republic whose focus revolves around exploring the relationship between humans and technology through immersive interactive audiovisual installations. His work involves generative visuals that utilize audio and sensor data to create captivating and dynamic experiences. He holds a Bachelor's and Master's degree in Time-based media and studied under renowned instructors Daniel Hanzlík and Pavel Mrkus.

**Title / Titulo**

Experiemnt

Duración / Legth

5

Description of the piece /

This audiovisual piece represents a breakthrough in sound diffusion technology by utilizing a full sphere (3D) Ambisonic format. The piece serves as a prototype for a semi-indeterminate numerical system researched by the author. The visual component was created by Mg.A. Petr Hanžl using TouchDesigner. The piece has a runtime of five minutes, and detailed explanations of sound diffusion methods, as well as examples of extracts from the piece, are provided in Chapter 9 of the research. Chapters 5, 6, and 7 provide in-depth explanations of how the visual elements were generated, structured, automated, and applied with effects. Overall, this piece represents an innovative approach to audiovisual production, merging cutting-edge technology with artistic expression to create a unique and immersive experience for audiences.

Title / Titulo Goodnight Tin Hau **Duración / Legth** 22

Description of the piece /

Between 2016 and 2020, I worked in Hong Kong, as an examiner for one of the various universities. During my visits, I stayed in the Causeway Bay area of the city where, jetlagged and unable to sleep, I would spend hours wandering the midnight streets. Disorientated and exhausted, I witnessed something unforgettable - the moment when the Hong Kong day collapses into night. This moment produces something of a pause... a breath... a gathering of forces... This moment was never silent, however. The city crackled, as if an electrical charge arced through the streets. Goodnight, Tin Hau uses recordings from my visits, along with an arch-form, in an attempt to re-live that moment. As I composed, however, I became increasingly aware of the changing political situation in Hong Kong, and now reflect on those four years as part of a much more serious pause... a collapse... a gathering of forces...

Dr. Phivos-Angelos Kollias explores emerging technologies' creative potential and impact on society. His projects often take the form of interactive performances, virtual reality or games. He has studied music in Cambridge, London and Paris with the support of four foundations.

He has received seven awards and nine nominations in international competitions, including the Excellence in Sound Design Award at FIVAR Stories Competition, Toronto. The group projects he has participated in have won twelve awards and distinctions, including the Apple TV Game of the Year award, Gamescom Indie Award and listed in Forbes top XR installations.

His projects have been commissioned by various international institutions like ZKM (Karlsruhe), German Music Council (Germany), Musikfonds (Berlin) and Dell Computers (USA). His works have been performed in over twenty countries worldwide in more than seventy concerts. His music scores are published by the Parisian publishing house BabelScores.

Title / Titulo Cosmodemonia **Duración / Legth** 10.50

Description of the piece /

Program notes

You are invited to participate with your senses, driven by your active listening - a state of mind between a passing moment of a rudimental everyday situation and a timeless, spaceless existence in the cosmos.

a kitchen of a busy restaurant

walking in a large parking lot

a summer morning waiting at the bus station

floating between planetary satellites

experiencing a gravityless stasis in outer space

a fearless movement towards a burning star with the speed of light

All sound is created through an 'intelligent' instrument, Ephemeron, an adaptive non-linear feedback network. Different actions-gestures interact with Ephemeron, reacting dynamically by analysing sounds' perceptual features.

Title / Título Interlineal **Duración / Legth** 10.50

Description of the piece /

"interlineal" is an acousmatic work that explores the specific spatial trajectories of timbres that gradually transform. It is a work based on the "lines" of sound that surround the listener by changing direction and height (physical and tuning).

It is commissioned by the GRM in 2017 and with the support of SNCA (Mexico). It is originally a multichannel work that seeks to explore the lines that connect different materials, space and sound sources. Composed at the GRM studios in Paris and at the Mexican Center for Music and Sound Arts (www.cmmas.org).

Their works have been selected and performed in Ireland, Italy, Portugal, Finland, Germany, Mexico, Macedonia, United Kingdom, Czech Republic and Spain, in acousmatic form, live performances, radio broadcasts for major festivals such as Radiophrenia Glasgow and Grand Prix Nova. The duo has several live participation to its credit, at conferences and events organised by Irish Sound Science and Technology Association ISSTA Limerick; "Spatial Music Collective SMC" Dublin, "Association of Irish Composers AIC" "Phonica" Dublin; "Sonic Dreams" Waterford, "Sonic Arts Waterford SAW", "Tidal Scratchings" Limerick, "Sonic Vigil" Cork, "Listen At" Dublin and at the "Prague Quadrennial of Performance Design". In 2022 the duo was commissioned the production of a live-to-air radio drama by Radiophrenia Festival.

Title / Título UNA AJUDA POR FAVOR

Duración / Legth 14:00

Description of the piece /

<>
The initial apparently unformed material "shapes-in" as the performance evolves and predefined elements find their place in the formal organization through an approach that grounds on classic musical structures.

To create the sonic landscape of this piece, a gong and utensils (steel cakelifter, aluminum mesh splatter screen, steel chain) were connected via piezoelectric transducers and a microphone to a computer running AudioMulch. The electrical charges generated by the piezos and the sounds picked by the mics were processed in real-time through a chain of filters and effects controlled externally by several Korg nanoKontrol units, while pre-processed field recordings are imported as audio files.

Title / Titulo Mas allá del sol **Duración / Legth** 06:00

Description of the piece /

MÁS ALLÁ DEL SOL

Más allá del sol, is based solely on AGN Argentina sound files (General Archive of the Nation), which are processed in various ways, obtaining a particular timbral mixture. It uses sound captures of illustrious personalities from Argentina, as well as sound material from indigenous peoples. In a morphological approach at the macro level, the work has a form in three blocks with different textures and characters, and that have certain common materials filtered and reprocessed. There is a sound continuity that develops over time and is usually broken by the appearance of objects that evolve over time and that interact with each other according to their morphological significance and their energy content. There is coexistence between concrete in its natural state, processed and synthetic.
